Corporate Profile

AgreeYa Solutions is a global provider of software, solutions, and services focused on deploying business-driven, technology-enabled solutions that create next-generation competitive advantages for customers. Founded by leaders from global consulting and systems integration firms, AgreeYa is a growing and dynamic organization that delivers change through innovation.

Our Offerings

Software

Custom-tailored to enable businesses to resolve their most critical operational and technological challenges, AgreeYa's future-ready and highly scalable suite of award-winning enterprise software includes:

QuickApps

QuickApps offers SharePoint users the ability to build customized solutions without the need for time-consuming code development. IT professionals can be more effective and achieve significant time and cost savings through QuickApps integrated and scalable modeling.

SocialXtend

SocialXtend is an intranet and enterprise social collaboration solution built on SharePoint. SocialXtend helps improve collaboration, increase organizational effectiveness and gain greater access to knowledge with the goal of driving employee, partner and customer engagement.

VDIXtend

VDIXtend is a Desktop-as-a-Service (DaaS) solution that enables anytime, anywhere and any device access to private cloud desktops on-premise or in a hosted environment.

BeatBlip

BeatBlip provides an innovative automation testing solution, which delivers efficiency, time and cost savings for organizations implementing new software into their ecosystems. Clients report as much as a 50 percent reduction in their test cycle times, while also achieving improved reliability and quality metrics.

Cogent

Cogent is the number one collections and case management software designed with creditors' rights and compliance in mind. Cogent enables law firms that concentrate in the area of accounts receivable collections and creditors' rights to control, manage, govern and automate their collections and case management — end-to-end.
