

SharePoint Managed Services

Optimize Your SharePoint Investment through Predictable Costs, Reliable Results and the Ability to Extend Your Expert Pool on Demand

In a typical SharePoint environment, personnel costs alone add up to 37 percent of your overall IT budget. People with specific SharePoint skill sets are not only difficult to find, but are expensive to hire and retain. There are a number of ISVs and consultants who can build SharePoint applications, but a limited few who specialize in providing end-to-end SharePoint infrastructure maintenance services.

With AgreeYa's managed services, organizations can take a more proactive approach to managing their SharePoint ecosystem; allowing them to focus on their business processes without having to worry about maintaining the underlying environment. With AgreeYa as your SharePoint managed services partner, you can assure your environment's health and stability, and improve on its performance, functionality and security while reducing costs and time spent on maintenance.

AgreeYa's SharePoint Managed Services

AgreeYa understands how crucial SharePoint is to your business. Therefore, AgreeYa provides comprehensive services to suit your needs. As a Microsoft Gold Partner, AgreeYa's technical support teams are all certified in core Microsoft technologies including SharePoint to provide oversight for part or all of your SharePoint farms 24/7/365 for a fraction of the cost of doing it in-house. These services can be provided in line with your own internal procedures or by using AgreeYa's proven CMMI-certified service delivery model.

As part of the managed services model, AgreeYa's experts act as an extension of your IT organization, enabling you to reallocate key skill sets to working on activities that can deliver competitive advantage through improved capabilities (Power BI, Planner and Security Groups), processes and systems. AgreeYa proactively updates and manages your systems to ensure security, stability and functionality in addition to providing best practice recommendations and a roadmap for the future. Our SharePoint managed services offering covers all deployments whether on premise, cloud or hybrid and are backed by strong SLAs to ensure prompt resolution of your service requests.
