Business Intelligence & Big Data Analytics

Smarter, Faster, Informed Decisions Through Intelligent Analytics

With the sheer volume of valuable data being generated daily, organizations have realized the importance of utilizing, managing and protecting their data for optimizing their business processes. More than ever, companies need the right information at their fingertips in order to make critical business decisions and respond quickly to market changes.

As a result big data and real-time analytics are assuming a more strategic role in helping businesses stay competitive. An effective big data program can help organizations tap into new markets, launch new products, save on operational costs, or make other game-changing business decisions.

With our proven experience in the development and maintenance of large enterprise data warehouses and business intelligence decision support systems, AgreeYa helps organizations design, develop and deploy robust big data strategies.

AgreeYa provides business intelligence and big data analytics services to enable its customers to make fast, accurate and intelligent business decisions. AgreeYa understands effective data warehousing (DW) and business intelligence (BI) initiatives require the integration of advanced technologies, careful consideration of data architecture and clear insight into market trends. AgreeYa's big data services include big data strategy, architecture and implementation of Hadoop ecosystems and data visualization tools. AgreeYa believes that each of these elements are fundamental for a successful customer relationship and business growth.

Simplify your Business Analytics Project

- Accelerate the deployment of an enterprise data warehouse by starting the process with models based upon industry experience
- Reduce risk of implementation since the data models are compiled from actual projects
- Apply proven best practices for data warehouse projects.
- Align operational decision-making with corporate strategy by using industry-leading metrics and KPIs.
- Get a systematic roadmap for implementation that includes a foundation for gap analysis.

AgreeYa Business Intelligence and Big Data Analytics Service Offerings

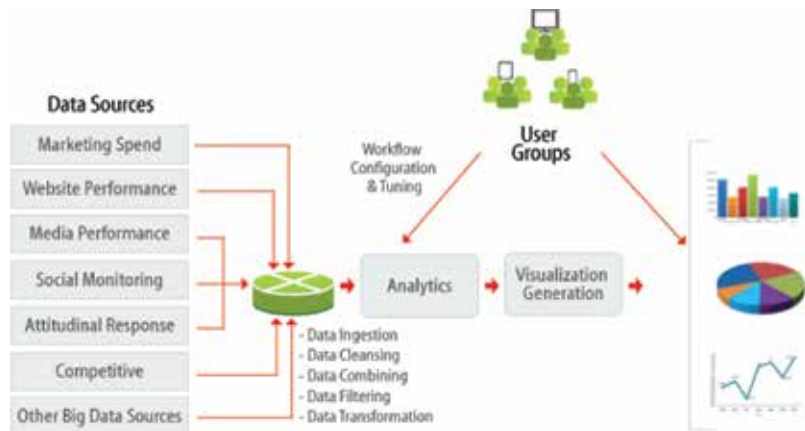

BI and Big Data Consulting	Data Management Solutions	Business Analytics
<ul style="list-style-type: none"> • Information Systems and Information Architecture Recommendations • Technology/Tools Evaluation • Roadmap for Solutions, Implementation and Reengineering Services • Data Quality and Governance Service 	<ul style="list-style-type: none"> • Database Management and Performance Tuning • Data Modeling and Data Integration • Data Merging, Migration, Implementation and Maintenance • Big Data Solution Architecture and Implementation • Cloud BI 	<ul style="list-style-type: none"> • Enterprise Reporting and Analysis • Dashboards and Visualization • OLAP and Multidimensional Analytical Solutions • Big Data Descriptive, Predictive, Prescriptive and Optimization Analytics • Social Intelligence and Collaboration
