

Empowering Sustainable & Productive Counties

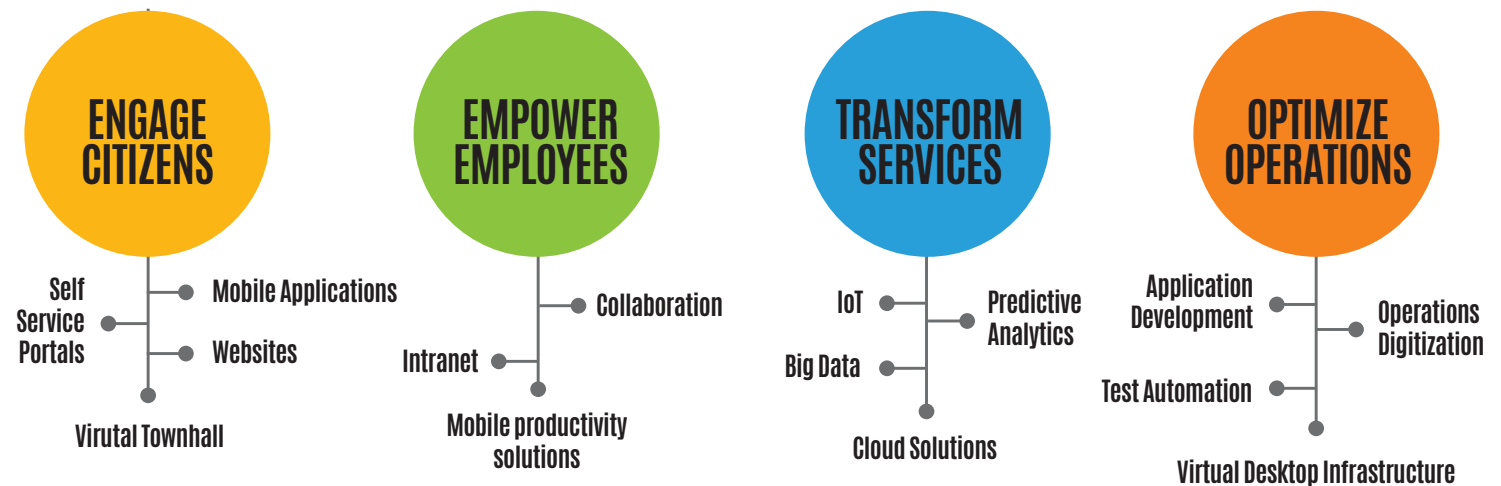

Introduction

For about two decades, AgreeYa has worked with local and state governments to increase productivity, enhance citizen services, drive efficiencies, and more. AgreeYa's goal is to transform government operations and citizen services using social, mobile, analytics, cloud, and other innovative solutions.

Today's organizations face big challenges, including shrinking revenues, budget cuts, outdated infrastructures and a talent crunch. They need to deliver enhanced services and administrative capabilities that put people first, to help them achieve more. Both citizens and businesses increasingly expect seamless, personalized and convenient self-service options in every aspect of their lives. Providing quick and easy access to information through technology fosters positive relationships between citizens and governments. With AgreeYa, local governments can leverage innovative people-first digital services and solutions to transform their organizational processes and citizen services.

What We Do

At AgreeYa, we understand that more and more state and local governments are rethinking the use of technology in an effort to streamline services, improve access to public information, provide government transparency, reduce lengthy application development processes and promote inter-agency data integration. By utilizing our innovative software, solutions and services, local governments are able to transform their operations and infrastructures; engage citizens and businesses; and accelerate their economic development and environmental sustainability.

Software

Governments today are faced with demands to not only do more with existing resources, but also to introduce innovation that aids citizen welfare. Our enterprise software offerings are designed to meet these challenges and provide distinct productivity advantages. We help you do MORE with LESS.

Ability to customize SharePoint-and Office 365 -based applications and solutions without coding.

VDIXtend is a Desktop-as-a-Service (DaaS) solution that enables anytime, anywhere and any device access to private cloud desktops on-premise or in a hosted environment.

Testing automation solution, which delivers efficiency, cost- and time-saving for organizations building and deploying applications across departments and agencies.

QuickFlow is a state-of-the-art workflow management application that allows management of businesses processes, collaboration and task management of intricate queued workflow patterns.

Solutions

Intranet & Citizen Self-Service Portals

Our intranet and self-service citizen portal offering delivers a robust digital workplace and citizen experience, both on-premise and in the cloud, through a combination of highly intuitive and feature rich out-of-the-box (OTB) solutions.

Mobile Applications/Productivity Solutions

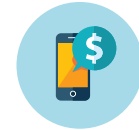

Governments can leverage AgreeYa's strong technology and domain expertise to successfully enable mobility in their organizations. AgreeYa partners with its customers from understanding the business requirements and drawing a strategic roadmap to enabling applications, creating mobile-friendly websites or building innovative apps.

Big Data/Analytics/IOT

Business intelligence, Big Data Analytics and IoT are critical to enable government to make fast, accurate and intelligent business decisions. AgreeYa offers solutions and services including big data technology planning, development of the analytics framework, infrastructure set-up & maintenance, as well as reporting & real-time analytics.

Cloud & Infrastructure

Governments today are focusing on reducing the cost of delivering public services and managing infrastructure while increasing efficiency, security and transparency. AgreeYa can help governments achieve this by identifying the right cloud strategy and moving applications, data, infrastructure and services to the cloud.

Services

Web Application Development & Management

Public sector organizations must find faster and more flexible ways to deliver custom applications to serve connected citizens, streamline internal operations and enable citizen self-service. AgreeYa helps government agencies to accelerate their digital transformation, so they can gain greater efficiencies, lower costs and better serve their constituents.

Application Modernization

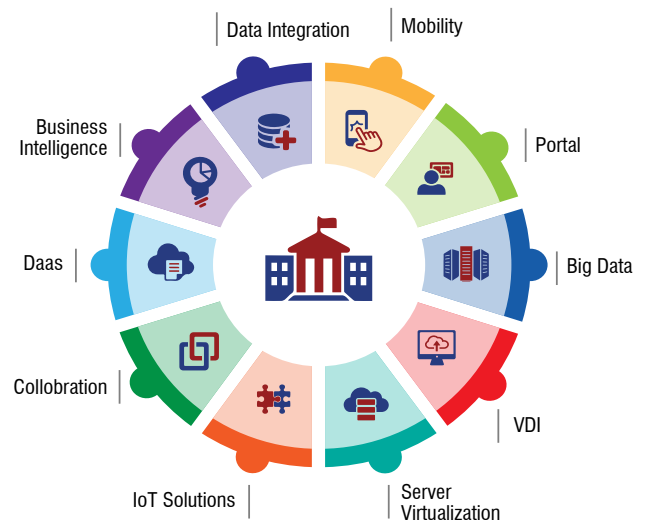

Local and state government is challenged with aging systems that are difficult to maintain and inflexible. AgreeYa can help in the modernization of these applications to take advantage of technology advancements that offer lower total cost of ownership (TCO) and higher productivity.

Manual & Automation Testing

We provide end-to-end testing services including planning, design, scripting, manual and automated testing, reporting and analytics. Our Testing-as-a-Service (TaaS) model provides flexible and cost-effective services for in-depth testing across multiple platforms and devices.

Managed Services

Government at all levels — federal, state and local — faces mandates demanding greater IT efficiency and optimization. Our managed service offerings provide the ability to rapidly procure IT services, scale up or down as needed and release when finished, resulting in the perfect mix of cost savings, improved service deliverability, and increased productivity and efficiency for government.

Why AgreeYa?

- 18+ years of experience delivering software, solutions and services to government
- 1,500+ professionals with technology and domain expertise
- Ranked #1 Software Developers by the Sacramento Business Journal
- 10+ technology recognitions from Microsoft including Azure Government. & CityNext partnerships
- Best Mobile Application Award from Microsoft during 2015 Microsoft World Partner Conference
- Worked with over 90 local and state government agencies and public sector organizations

Success Stories

VDI solution simplified IT management for a public health institution

Challenge

The hospital wanted to provide reliable and up-to-date computing infrastructure to its staff responsible for providing direct medical care to some 200,000 patients annually.

Solution

AgreeYa implemented a VDI solution utilizing VMware technology, providing the medical staff access to faster and more reliable computing resources while streamlining IT management.

Delivered an engaging and collaborative intranet to a government agency

Challenge

The agency's vision was to support its organization's information management needs by providing an engaging and collaborative intranet.

Solution

AgreeYa designed and implemented a best-in-class intranet on Microsoft SharePoint that enabled the agency to transform to a connected enterprise.

Helped a leading state agency reduce emissions

Challenge

The state agency that monitors and regulates emission programs was finding it difficult to track compliance due to manual interventions.

Solution

AgreeYa analyzed, designed and implemented a customized and secure web-based Vehicle Reporting and Tracking System. The system is used by the staff to ensure compliance and produce the necessary reports.

Improved healthcare and claim processing

Challenge

Obsolete technology, conflicting information, access to real-time data to process claim and compliance to health and accounting guidelines.

Solution

We built a state-wide web-based system to automate the business process necessary to enable government to make fast, accurate and informed decisions.

About AgreeYa

AgreeYa is a global provider of software, solutions, and services focused on deploying business-driven, technology-enabled solutions that create next-generation competitive advantages for customers.
