What is VDIxtend?

VDIxtend is a hosted private cloud desktop solution that enables you to easily provision and access business apps and desktops. VDIxtend enables businesses of all sizes to embrace a modern mobile work-style and is a perfect solution to support your Bring Your Own Device/Computer (BYOD/BYOC) initiatives. With its simple and easy-to-use interface, teams can provision desktops and apps anytime and on any device, including iOS, Windows and Android-based platforms. VDIxtend is simple to provision, integrates with industry leading thin client and virtualization platforms such as Microsoft, Dell, VMware and Citrix and is easy to manage and maintain.

Its built-in app store feature allows desktops and thin clients to be configured with applications the user needs, allowing you to customize the environment per your unique project or business needs. The feature enables organizations to maintain their own private app store accessible anywhere, anytime and on any device and comes preloaded with a variety of free apps that can be expanded to include licensed applications such as Microsoft Office suite, Skype and QuickBooks.

VDIxtend integrates with industry leading thin client and virtualization platforms:

Wyse

Features

- Any Device Access- cross device, cross platform access including PC, iPad, tablet and smartphone.
- Enterprise App Store- for organizations to build their own private app store for user-self-service of business applications.
- Host Profiles- create a profile once and then use it to configure and provision multiple hosts and clients.
- Centralized and Single Management- VDIxtend provides you with a single platform for provisioning and managing multiple workspaces including full feature desktops and applications.
- Single Sign On (SSO) - single-sign on enable users to sign in to VDIxtend using a unified web portal to access desktops and business apps.
- Improved Security- VDIxtend enable teams to centrally roll out security patches, updates and data backups on hosted desktops, eliminating any concerns about data loss.
- Ready to Deploy- VDIxtend is an on-demand solution that enables day-one provisioning of fully featured desktops to be delivered instantly to users anywhere on any device.
- Self Service Portal- with access to its unified web portal, IT and project teams can easily provision multiple user instances and assign or revoke features centrally with no more than few clicks.
- Analytics and BI- business insights with VDIxtend provide comprehensive chargeback reports on infrastructure service costing, instance and business app usage enabling organizations to align IT spending with business priorities.
- Multi-Vendor Integration Support- VDIxtend integrates with industry leading thin-client and virtualization platforms, protecting your legacy IT and future cloud investments against vendor lock-in.
